

PRESS RELEASE

Product Profile: Rize Enterprises is pleased to introduce the newest product to our line, the KL600 Kwik-Loc™! As with our other Kwik-Loc cable locks, the KL600 can be used as a fast and reliable way to suspend services, lighting, and strut. Cable locks are to be used on static load applications only.

The KL600, when used with 1/4" 7x19 construction galvanized steel wire has a working load limit of 1,100 lbs (500 kg), or when used with 6mm 7x19 construction galvanized steel wire has a working load limit of 900 lbs. (409 kg).

If you are interested in purchasing these or want to learn more, please contact your local sales representative.
