

KV BRACKET

KL100

The Rize suspension system utilizes Kwik-Loc cable locks and wire rope to secure ductwork and equipment. This method has been shown to reduce installation time and improve safety at the jobsite when compared to traditional hanging methods such as threaded rod, perforated strap, and band iron. The KV bracket enhances the suspension system by the addition of an integral bracket, which fastens the Kwik-Loc to the duct with sheet metal screws. Once the KV bracket is attached to the duct, the wire rope "drop" is passed into the entry hole at the top of the bracket, through the Kwik-Loc, and out the exit hole at the bottom. The locking teeth inside the Kwik-Loc engage the wire rope and secure the ductwork in place.

- Easily attached with sheet metal screws
- Kwik-Loc pre-assembled to bracket
- Accessible release pin for simple adjustment

Ordering Information

Item #	Code	Description	Quantity	Working Load Limit
30298	KV100	Support Bracket w/KL100 for use with WC3 Cable	4/bag, 25 bags/box	150 lbs.
