

SKL200

Used in conjunction with the SKL200, the Cat Loc can be used to suspend lights and signs from a horizontal cable. This aesthetically pleasing system is fast and easy and will help you install lighting where no anchor points are available.

Once the Cat Loc is installed on the horizontal cable you are able to move it and lock it in place at the ground level by twisting the cable. This saves time on the work site having to go back up to the unit to move and lock in place.

The Cat Loc has a working load of 75 lbs (34 kg) and is sold with the cable already attached to simplify installation. It is available in different lengths.

- A work load limit of 75 lbs (34 kg)
- Sold in sets with pre-attached cable
